Section A

1 Explain the following terms
  a)   Agile Thinking
  b)   Digital Thinking

2 Explain the characteristics that make up the agile mindset.

Section B
 Multiple Choice Questions.

1 What is the core principle of Agile Thinking?

   A)Following a strict plan and avoiding changes.
   B) Solving problems by implementing rigid processes.
   C) Responding to change and solving problems quickly and easily.
   D) Ignoring feedback to maintain consistency.

2   The Agile Manifesto emphasizes which of the following?
   A) Strictly adhering to predefined plans.
   B) Prioritizing rigid processes over interactions.
   C) Valuing people and interactions over rigid processes.
   D) Avoiding customer feedback for faster development.

3   According to Agile Thinking, how should successes and failures be viewed?
   A) As mere results that don't require further analysis.
   B) As opportunities to learn and improve.
   C) As barriers to future progress.
   D) As events that should be avoided.
4   What does continuous improvement in Agile Thinking involve?
   A) Maintaining the same approach until goals are achieved.
   B) Regularly refining the approach and learning from adjustments.
   C) Ignoring feedback to avoid delays in the process.
   D) Focusing only on immediate outcomes rather than long-term goals.
5   What is the significance of a positive attitude in the agile mindset?
   A) Avoiding challenges and risks.
   B) Maintaining optimism and resilience to motivate team members and embrace change.
   C) Focusing solely on individual achievements.
   D) Adhering to rigid plans without flexibility.
6   How does the agile mindset promote a thirst for knowledge?
   A) By avoiding experimentation to minimize errors.
   B) By prioritizing static methods over new skills.

C) By encouraging the desire to learn, improve practices, and stay updated on trends.

D) By discouraging team members from seeking feedback.

7   What does pragmatism in the agile mindset emphasize?

A) Developing complex but impractical solutions.

B) Relying on theoretical approaches over achievable goals.

C) Choosing realistic and effective approaches to problem-solving.

D) Ignoring team collaboration in decision-making.

8   What does a willingness to fail represent in the agile mindset?

A) Avoiding risks to ensure consistent success.

B) Treating failures as setbacks to be avoided.

C) Accepting risks and using failures as opportunities to learn and improve.

D) Ignoring experimentation to maintain stability.

9   What does digital literacy encompass?

A) The ability to use digital devices without critical evaluation.

B) Basic technical skills limited to operating digital tools.

C) The ability to find, evaluate, and compose clear information across various digital platforms, including critical understanding of digital content, tools, and platforms.

D) Writing content without analyzing its relevance on digital media.

10 Which of the following is most suitable to describe "Willingness to fail"?

A) The more times you try, the more you will fail. Accept it.

B) To avoid failure is to avoid success.

C) There is 50% chance to succeed, so it is okay to fail.

D) Success is just around the corner. Do it right the first time
